

Commercial Lending Platform – Complete Product Specification

This document provides a complete overview of the proposed Commercial Lending Platform. The goal is to create a full-scale, all-in-one digital ecosystem that allows brokers, loan officers, and administrators to manage commercial loans, streamline operations, automate workflows, and scale their businesses efficiently. This software combines functionalities from LendingWise-style systems with enhanced CRM, E-signing, marketing automation, calendar management, and back-office tools to provide a full brokerage management experience.

1. System Overview

- 1 The Commercial Lending Platform will serve as a unified portal for brokers, loan officers, and clients.
- 2 It will integrate features such as Loan Origination, CRM, E-sign, Task Management, Marketing Automation, and Reporting.
- 3 The system should be modular, allowing expansion for new features and third-party integrations.
- 4 Primary use case: Brokers managing loan pipelines, hiring loan officers, and automating business operations.

2. User Roles and Permissions

- 1 Super Admin: Controls global settings, billing, integrations, and overall access management.
- 2 Company Admin: Creates organizations, assigns brokers, manages permissions, and monitors performance.
- 3 Broker: Manages deals, recruits loan officers, handles clients, and tracks commissions.
- 4 Loan Officer: Works under brokers, manages deals, and communicates with clients.
- 5 Client: Submits loan applications, uploads documents, signs electronically, and tracks loan progress.

3. Core Modules

- 1 E-Sign Integration: DocuSign, Adobe Sign, or HelloSign APIs for seamless document execution.
- 2 CRM: Manage leads, referral partners, and clients. Track communication history and loan status.
- 3 Email Marketing: Build, automate, and send campaigns for lead nurturing, follow-ups, and education.
- 4 Calendar: Integrated with Google/Outlook for scheduling client calls, loan closings, and reminders.
- 5 Back-Office Portal: Tools for underwriting, compliance, loan packaging, and funding verification.
- 6 Document Management: Secure cloud-based upload and storage system with version tracking.
- 7 Deal Management: Full Loan Origination System (LOS) from lead intake to closing.

- 8 Internal Chat: Real-time communication and notifications between team members.
- 9 Task & Workflow Automation: Assign and track tasks, with triggers for follow-ups and document requests.
- 10 Reports & Dashboards: Analytics for loan volume, conversion rate, commissions, and KPIs.

4. Advanced Broker Capabilities

- 1 Broker Recruiting: Brokers can hire and manage other brokers or loan officers within their organization.
- 2 Revenue Sharing: Commission split tracking between brokers and loan officers.
- 3 Company Branding: Each broker or company can have a branded portal with custom logo and domain.
- 4 Multi-Tier Hierarchy: Parent company > Broker > Loan Officer > Client structure.
- 5 White-Label Support: Platform can be rebranded for partner organizations or franchises.

5. Automation & Integrations

- 1 Lead Capture Forms: Customizable loan application and intake forms.
- 2 Workflow Builder: Visual flow editor to automate email/SMS sequences, follow-ups, and deal assignments.
- 3 Credit Check & Financial API Integrations: e.g., Experian, Equifax, Plaid, QuickBooks, or Stripe.
- 4 CRM Integrations: Support for GoHighLevel, HubSpot, Salesforce.
- 5 Email & SMS Tools: Integration with Twilio, SendGrid, Mailgun for automated communications.
- 6 Calendar Sync: Integration with Google Calendar, Outlook Calendar, and Apple iCal.
- 7 E-Sign APIs: Direct connection to DocuSign or HelloSign for instant signing.
- 8 Document Parsing & OCR: AI-assisted data extraction from uploaded financials.

6. Back-Office & Compliance Tools

- 1 Underwriting Module: Internal review dashboard for DSCR, SBA, Bridge, Construction, and other loan types.
- 2 Compliance Tracker: Logs every action for audit readiness and transparency.
- 3 Commission Management: Automatically calculates broker and loan officer commissions.
- 4 Document Templates: Standard forms for LOIs, term sheets, and submission packages.
- 5 Team Collaboration: Shared notes, comments, and internal feedback system.
- 6 Lender Database: Pre-loaded and searchable lender profiles by product type and criteria.

7. Technical Requirements

- 1 Frontend: React.js or Next.js framework for responsive design.
- 2 Backend: Node.js, Python (Django/FastAPI), or Laravel for robust APIs.
- 3 Database: PostgreSQL or MongoDB (cloud-hosted).
- 4 Hosting: AWS, Google Cloud, or Azure infrastructure with load balancing and auto-scaling.
- 5 Authentication: OAuth2, JWT, and 2FA security standards.
- 6 Encryption: AES-256 and SSL for all data in transit and at rest.
- 7 API-First Architecture: All features accessible via REST/GraphQL APIs.
- 8 Scalability: Designed for multi-tenant SaaS model supporting hundreds of organizations.

8. Future Roadmap

- 1 AI Deal Assistant: Automated pre-underwriting and borrower qualification suggestions.
- 2 Mobile App: iOS and Android app for brokers and clients with push notifications.
- 3 Marketplace: Connect brokers, lenders, and vendors for deal collaboration.
- 4 Analytics Dashboard: Predictive analytics for deal flow and performance tracking.
- 5 Integration with LinkedIn, Zapier, and GoHighLevel for marketing automation.
- 6 Training & Support Hub: Built-in e-learning portal for onboarding and certification.

9. Summary

The Commercial Lending Platform is designed to modernize and automate every stage of the commercial loan process — from lead generation to closing. It empowers brokers to build teams, manage clients, automate communication, and maintain compliance — all from one central system. The modular structure allows future integrations, scalability, and white-label expansion to serve as the backbone of a modern commercial lending ecosystem.
